Art Unit: 1614

Claims 1-13 are presented for examination.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claimed invention is directed to a composition and method of treating corneal epithelial disorders, using a compound having an effect on activating Rho. The specification discloses examples of structures of some compounds within the scope of what is claimed. However, there is no evidence that there is any per se structure/function relationship between the compounds having an effect on activating Rho and any others that might be found using the claimed method. Structural identifying characteristics of group of compounds affecting the activation of Rho are not disclosed. Therefore, the claimed invention is not supported by an adequate written description.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102 (b) as being anticipated by Liliom et al. for the reasons set forth on page 2 of the office action of March 27, 2003.
